

CAROLYN SELHEIM-MILLER

FRONT-END DEVELOPER

(908) 675-2419 • carolyn.selheim@gmail.com • Denver, CO

PROJECTS

LetMeKnow • letmeknow-csm.herokuapp.com • github.com/CarolynSM/LetMeKnow_Frontend

A mobile-first app that allows hosts to manage the guest list for an upcoming event. The host dashboard allows hosts to view the current invite list, who's responded, is coming, and is bringing a friend, and generates a total head count. Hosts can add and delete invites from the list and manually update an RSVP. An additional table at the bottom lists "Plus One's" and who they're coming with. A simple RSVP form allows guest to update their response - which is immediately available within the host dashboard.

Technologies used: React.js (including React Router, React Modal), Chart.js, Express, CORS, PostgreSQL, Knex.js, Cypress

Best Wine Friends • best-wine-friends.firebaseio.com • github.com/CarolynSM/best-wine-friends-frontend

BWF is the easy-to use, mobile-friendly wine pairing app that makes pairing suggestion based on your main ingredient and chosen flavor profile. Use it when you're out to eat or planning the perfect dinner at home. Taste a new wine pairing you love? Suggest it right within the app!

Technologies used: HTML5, CSS3, Vanilla Javascript, Node.js, Firebase, Express.js, CORS, Mocha, Heroku
